DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Admitted Prior Art of Fig. 2 (hereafter "AAPA").

With regard to claim 1, AAPA discloses a row driver comprising a circuit as shown in Fig. 2. Note that phrases such as "adapted to" (for example, claim 1, line 1) and "operable" (for example, claim 1, line 4) are functional language which bears no patentable weight. It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. See *In re Hutchison*, 69 USPQ 138 (CCPA 1946).

With regard to claims 2-4, see comments on phrases "adapted to" supra. With regard to claim 5, AAPA further discloses a first output circuit comprising a PMOS transistor (PMOS drive transistor 202 in Fig. 2) and a second output circuit comprising an NMOS transistor (NMOS drive transistor 204 in Fig. 2). With regard to claim 6, AAPA additionally discloses an isolation circuit comprising a transistor (NMOS transistor 210 of Fig. 2).

Claims 7-22 are similarly rejected.
